

# Sweet Kendall Needs Your Help

During her delivery, in July 2011, Kendall went without oxygen for an unknown amount of time, leaving her with a severe brain injury that has affected her life dramatically.

Unlike her identical twin, Kendall can not sit, talk, walk, or crawl. She can not swallow and eats through a Gtube.

Kendall's mom and dad are desperately trying to raise \$20,000 for life changing treatment at the very reputable Stem Cell Institute in Panama City.

**PLEASE, if you can donate, any amount, large or small, it would be greatly appreciated.**
